 - rupeshdahal07

A computer science student passionate about backend development, seeking a backend internship to apply my skills in Python, Django, and problem-solving to real-world projects. Eager to contribute to a tech team while continuing to grow and learn.

## EDUCATION

### The Westminster College - BSc Computer Science

January 2024 - Present

- Technical Courses - Python, Data Analysis, Foundation of Mathematics
- Academic Skill Courses - Critical Thinking, Introduction to Academic Practice

### Viswaniketan College

Jun 2021 - Jun 2023

- Computer Science
- Physics, Chemistry & Mathematics
- Grade: 3.41 GPA

## SKILLS

- **Proficient languages** - Python, HTML, CSS
- **Frameworks** - Django
- **Technologies** - Git, Postgres

## PROJECTS

### E-commerce Website

- Built a basic e-commerce platform for product listings, shopping cart functionality, and checkout
- Implemented backend logic for dynamic product listings and data validation to ensure a smooth user experience.

### Login System with Django

- Developed an entry-level user authentication system with Django, featuring login, logout & registration
- Focused on strengthening skills in user authentication workflows.

### Rain Alert Application

- Created a simple weather alert app that provides rain notifications based on user location
- Integrated with weather APIs, building initial skills in API consumption and data handling.
